# All Drawing Media: Memory and Imagination

- Our goal is to communicate, even if just to ourselves.
- Step 1 – **Observe** the world around you – big picture, as well as details, shadows, form, value, and **Practice** your drawing technique by sketching and drawing constantly
- Step 2 – develop your own **Visual Point of View** to express in drawing or painting. What do you like to draw? Why? What captivates you most? What is the most fun to draw or paint?
- Step 3 – Use your **Memory** and **Imagination** to edit, rearrange, replace, create the most excellent version of your ideas (**WHAT** you are focusing on in your drawing and **WHY**) that you can.
- Draw objects and scenes with an emphasis on observing, build your mental database.
- Use your memory to collect ideas you want to convey – bring all your senses in to remembering and recording the scene – hearing, smell, touch, sensation, emotion.
- Use your imagination to rearrange elements to create a composition that gets across the point you want to make, the focus of your drawing.
